(User Group) limited in Joomla + XML Parsing error

Posted by claire90 - 2012/02/10 01:50

Hello,
I have two problems with Quiz Lite component. I only use the component.
I am on joomla 1.7.3 and ARI Quiz Lite 1.1.3

First :
when I create a Quizzes it put me two times this message :
XML Parsing Error at 1:15. Error 57: XML declaration not finished
But I can use it and display a quizz on my website.

Second :
I donâ€™t have all Joomla Access (User Group), only guest and registred.
I have two groups of users that are registred, so I need that.

I saw in an other thread this tips : change WYSIWYG editor or disable it - but it doesn't change anything in my case.

Thank you very much in advance
regards
claire

Hello,

"ARI Quiz Lite" supports only simple user group access (guest and registered) for J! 1.7.

About problem with warning message, we can investigate it if you provide a temporary access to your J! backend by email.

Hello,
thank you for your quick answer.
I will do only registred so.
About the parsing erro, I can't give you the acess, it's my boss website and he doesn't want to.
If you have an idea of the source of this type of issue it would be great, so I could test it myself.

regards
claire

Usually this problem with a WYSIWYG editor. If it doesn't help in your case, it requires additional investigation.
