Send email to the user if successful.

Posted by troensbevis - 2011/06/22 07:30

Hello
We are in deep need of a feature allowing us to send a "diploma" by email to the users that have passed the quiz. This is something we can't do manually, as we are about to get too many people every month.

- When a user is finished with a specific quiz and has passed it, we want to send them an email congratulatating them.

We are willing to pay for it if that's an issue, as we need the feature yesterday :)

Thanks.

Hello,

The extension can send mail automatically when a user finishes a quiz. For this enable "Auto send mail" checkbox in quiz settings and choose appropriate mail template in "Successful Email Template" and/or "Failed Email Template" drop-downs. Mail templates can be create in "Mail Templates" section on component backend.

Regards,
ARI Soft
