Can\'t get JNews Slider plugin to work.

Posted by kellir - 2010/08/31 01:09

I have the smart content component installed. I would like to be able to use the J News Slider plugin. I input this in the smart content module in the parameters,

```
{arijnewsslider height="130" width="496"
articleSortField="ordering" articleItemCount="3"  articleSecId="2" articleCatId="5"}
{$title}
{$introtext}
    {/arijnewsslider}
```

I'd like for it to pull articles from that category into the slider. Do I also have to set parameters in the component plugin window. I tried adjusting setting there but nothing worked?

Thanks, Kelli :(

Hello,

Could you provide link to page where we can see this issue and temporary access to your Joomla! backend by email that we can investigate this problem?

Regards,
ARI Soft
