## Change Choice Label

Posted by nestortoledo - 2009/05/06 20:47

---

As i tell in this post <http://www.ari-soft.com/ARI-Quiz/1886-Change-Choice-label.html>

I would like to change the numbers of the choice labels to letters like this.

Choice 1) -> Option a)

Choice 2) -> Option b)

Thanks

Hello,

The component supports this ability since version 2.5.0. You can change it on quiz settings page with help 'Answers Order Type' parameter.

This component is really the best, but i will like to change choice labels to LETTERS only without the CHOICE beside the letters like this

Choice A -> A

Choice B -> B

Choice C -> C

Thanks

Hello,

"Choice" label can be changed in \language\en-GB\en-GB.com\_ariquiz.ajax.ini language file. You can read here how to edit language files.

Thank you so much, it works great.

But i have further challenges, I want a situation whereby question skipped can be jump to directly instead of clicking back or next button. (Example GO TO ques. 1) or (GoTo 1).

Thank you.
