Subcategories
Posted by robyki - 2011/12/30 12:27

I am evalutating AriQuiz and I realized that it's impossible to create for each quiz list name, many subcategories.

The component seems to allow to set even endless quiz categories but just only under 1 main category.
For example in "Quiz List" I have Name=x Category=y.
I would like to have under the Name=x, other 10 quiz categories per each name.

Something like Category VEHICLE - Quiz Name:CARS - Subcategory Quiz1 Name=FERRARI - Subcategory Quiz 2 Name=PORSCHE - Subcategory Quiz3 Name=LAMBORGHINI etc... Then Quiz Name:MOTORBIKES Subcategory Quiz1 Name=HONDA - Subcategory Quiz 2 Name=DUCATI - Subcategory Quiz3 Name=SUZUKY etc...

Basically what I need is to have a step more for creating another category.

Regards

Hello,

Currently the extension doesn't support ability to create sub-categories. This feature will be available in a future release.
