Display problem with lightbox popup.

Posted by navidmitchell - 2011/04/02 00:56

Hello,

First off let me say I love your module.

I have a problem with it displaying correctly on my customers site. It worked fine in my test environment.

The box is separated and the small thumbnails are only displaying an arrow.

I hope you can help me out.

Here is a screen shot of the problem

Also you can see here.

Hello,

This is the problem with site template styles. Add the next CSS rules to site template CSS file that fix it:

```
.pp_pic_holder div
{
 padding: 0;
}

body .pp_gallery li.default a img
{
 display: block;
}
```

Regards,
ARI Soft
