Some features needed

Posted by aliroman - 2009/09/07 10:53

_____

Hello Ari developers,
Ari quiz is convenient product, and most of departments like it.
But I need some features for full happiness)

1. More flexible user results template. Now we need to hide right answers, i tried to do it, but as you know, all files are encoded...

2. Ability to make templates for results export. For example I don`t need to exprot most of columns in Excel exporting by default..

I must to close project 15 october, and make quiz for 600 people.
Point 1 is very important.

Best wishes,
Roman Ali
