How would I accomplish this?

Posted by KremeChoco - 2012/09/25 03:46

So I been trying to do the following:
Have several links to images for example:

ImageLink1 ImageLink2 ImageLink3

And of course, when you click on it, the image will pop up. However, how would I be able to make it so:
1. If I click ImageLink1, I can click the arrow on the right to move onto ImageLink2
2. No resizing is done.

==========

Hello,

If ImageLink1,ImageLink1,... are links which are created in an article using HTML code like the following code:

It is possible to use "System - ARI Pretty Photo" plugin and use the following code for links:

Where LINK_TO_IMAGE is a link to an image.

Regards,
ARI Soft
