Blurry Images?
Posted by gianluca1 - 2013/02/04 21:04

Hi, first of all great extensions. I have used it a few times on other websites. But i am having a problem on my current project.

As you can see the images are blurry and not clear, but if you right click on the image and open in a new window you can see its perfectly clear.

Regards
G

Hello,

Your images have small dimensions 150x64, but you enabled responsive mode and set width to 753 pixels. Set width to 150 so images look normal.

Regards,
ARI Soft

Hi Admin

Thank you for your fast responce! Much appreciated. I changed the width to 150 but now the image is small. I have attached the screenshot of the config section of the module but i dont know what i've done wrong.

Thanks http://www.ari-soft.com/images/fbfiles/images/slider-f5e6a131d622a915e05a1e1b5f861a1b.png

Problem has solved, must of been browser cache

Thanks for your help :D
