Another suggestion

_____

Hi,

I would like to suggest another feature:

That the Quizzes may choose random questions (at the number - count - of the questions the quiz should have) from a Bank Category. This way, I would be able to record hundreds of question on a question bank, linked to a Bank Category, and the quiz would select, for example, 40 questions from the bank.

Tks again,

Best regards,

Paulo

_____

Use "Question pool" parameters section in question category settings.

Regards,
ARI Soft
