Joomla 1.6 Extension manager - discover ?!?

Posted by ZegativeNero - 2011/04/13 03:47

Hello,
i`ve installed ari sexy lightbox lite under joomla 1.6 and everything works!
Only Problem:
When I open the extension manager and hit discover, the plugin is listed ?!?
If I select it, and hit install, there are some error messages, and there are two plugins under the "manage tab". Its impossible to uninstall one of them.
How can I fix this ?

Best regards

Hello,

We don't see the plugin on "Discover" tab on our test server. We can investigate described problem if you provide temporary access to your Joomla! backend by email.

Regards,
ARI Soft
