
warning message for users

Posted by mali - 2010/02/10 19:46

is there any way to give a warning for a user who give up completing test. I would like a feature to give a warning to the user if he does not complete test and clicks other links in menu while there is still questions that are unanswered or unseen...

such as "you have not answered all questions of this quiz are you sure to exit anyway" or something like that

=====
