Inline content linked to picture?
Posted by nkellert - 2012/06/05 04:57

Ok I got the code down on how to show text and have it linked to a lightbox which shows inline content. Can someone give me an example of how to link it to a picture? Thanks for all your guys support!!

Hello,

Use the next HTML code:

Any HTML content

Where LINK_TO_IMAGE is a link to an image.

Regards,
ARI Soft

my fault for not being completely clear. Im trying to use the plugin {/arisexylightbox} tags in chronoforms

I can link it to a words....but I dont know how to link it to a picture...as in someone clicks the picture and then the lighbox pops up with inline content.

just realized im in the light forums...but if you could get me an answer anyway id appreciate it! thanks!

Could you specify what plugin code do you use?

{arisexylightbox activeType="icontent" width="500" height="700" link="Click For Deatails" title="My Title"}

HTML HERE

{/arisexylightbox}

this works just fine...i just want to be able to link the content to a picture instead of "click for details"

You can find the answer in documentation for the plugin. It is located here. The code looks like:

```
{arisexylightbox activeType="icontent" width="300" height="250" title="Hidden text"}
    {link}{/link}
    {content}Inline content which you want to show in sexy lightbox goes here.{/content}
{/arisexylightbox}
```

Where LINK_TO_IMAGE is a link to an image.

thanks...i misunderstood the purpose for the link tags...i thought it was an easy way to show the image...no to link to it. Thanks again for your guys help. Your amazing as usual.
