Passed Perecentage always zero
Posted by dcasmr - 2008/07/29 01:38

Hi,

Is this a bug? Why is it that the Passed Percentage: in the results report is always zero regardless of whether the answers are 100% correct or not?

Passed Percentage :
 0.00 %

==========

Passed Percentage means how many percents is the pass score. It is set when editing the quiz. If you set it to 60% it will mean that every person that will score 60% and more will pass the test.
