
Show Full Statistics only on passed quiz

Posted by joeicooper - 2010/03/05 15:55

I wonder if we can allow only the Show Full Stats when a user successfully passes a quiz, and not when they fail. The idea is to have a user that failed retake the quiz without giving him the answers to the questions he missed.

Also, if you could add a variable to the Show Full Stats link in the mail/text templates (perhaps \$fullstats or something like that) it would be very helpful.

Thank you so much,

Joe

I'm on v2.9.1, does 2.9.3 include this feature? I don't see a changelog for 2.9.3.

Thanks,

Joe

Hello,

This feature has not yet been implemented in the component.

Set "Show detailed results" parameter to "On success" to show detailed quiz results only if a user passes a quiz successfully.
