## send notoces to learners

---

I would like to see development allowing an email notice to be automatically sent to selected members.  
For example a test begins publication on 12/22/2012 that is intended for users "employees" who have public and registered permissions

In the quiz setting allow email group selection on or off

Something like:

Dear {membername}

A quiz on {quizname} is available for you to take... blaaaa blaaaaa blaaa.. adjustable in text templates.

So... what do you think the chances of this are? Im sure its something most users wohld like to see

Thanks for your consideration.
