
This webpage has a redirect loop....

Posted by Tutor Martin - 2013/07/19 08:19

I make a link in my article to the user result of the test. This link will also be visual for guests, but when guest click on the link they get an error page saying 'This webpage has a redirect loop'

Is it possible that guests can get a message that they have to be locked in to see their results?

I hope you can help me again :cheer:

Martin

Hello,

Set "Access" parameter to "Registered" on menu item settings page.

Regards,
ARI Soft
