Three kind of results

Posted by Federico - 2010/10/03 19:58

Hi!

A lot of test's sites shows three kind of results.

1) Result of test (it as yours text template)

2) Result of test for insertion in a blog

3) Result of test for insertion on a forum

Two last results should have references to start of test.
For this purpose is not necessary to make new templates. But it should be possibility to add manually references to start of test (if the "ARI Quiz in content plug-in" is used for tests)

References from another sites (blogs and forums) will increase popularity of sites, who use Ari Quiz!!!

Best regards!

==========
