Problem with aricsvtable

Posted by jue_mue - 2009/01/30 16:12

Hi,

I just bought ARI Smart Content which seems to be a great plugin collection.
However, I still have a problem getting aricsvtable to work:

1) I have a text csv file with three columns, a header and 2 data entries

2) I put the following tags into an article:

```
{aricsvtable file="http://my.domain/images/stories/csv/test.csv"}
{aricsvtablecolumns}
  {aricsvtablecolumn id="Name" alias="Name" width="30%" className="idg"}
  {aricsvtablecolumn id="City" alias="City" headerClassName="head"}
  {aricsvtablecolumn id="Mail" alias="Mail" headerClassName="head"}
{/aricsvtablecolumns}
{/aricsvtable}
```

All other parameters are unchanged.

The result is an empty article. I am not sure about the columns id's and classNames.

The same csv file works fine in JCSV 2 Table.

Thanks for any hint.

JM

Hello,

Try the following code, please:

```
{aricsvtable file="images/stories/csv/test.csv"}
{aricsvtablecolumns}
{aricsvtablecolumn id="Name" alias="Name" width="30%" className="idg"}
{aricsvtablecolumn id="City" alias="City" headerClassName="head"}
{aricsvtablecolumn id="Mail" alias="Mail" headerClassName="head"}
{/aricsvtablecolumns}
{/aricsvtable}
```

If it don't work, send us your CSV file, please.

Regards,
ARI Soft

Hi,

Thanks a lot. Meanwhile I figured it out myself... however, the URL worked fine with ARI JCSV Table. That's why I used it for the CSV Table as well.

Regards,

Juergen

PS: What a great set of plugins!
