
Formating table

Posted by vanka - 2009/02/03 21:28

Hi, i think that there is no stupid questions so ...

I upload csv file and i have data in content,
<http://proba.prodavnicaideja.com/content/view/12/27/>

now i want it to look like this
http://www.printall.rs/index.php?option=com_content&task=view&id=21&Itemid=55
(i made that manually) so i will probably have lot of questions :)

1. i dont have any value in first and second cell of first row but plugin put there numbers 0 and 1 (I know that is because that is a header row)
How to clear that?
SOLVED - turn of heading

2. how to make colspan in rows 1, 8 (starting with two empty cell than "Doplata: ..."), 11, and 19

3. how and where setup styles for rows

4. after row no. 10 i need one empty row

=====

Hello,

According to your questions:

1) You can do the following

```
{aricsvtable file="file.csv"}
{aricsvtablecolumns}
{aricsvtablecolumn id="0" alias=" "}
{aricsvtablecolumn id="1" alias=" "}
"}
{/aricsvtablecolumns}
{/aricsvtable}
```

In other words, you can set alias parameter to " " for needed columns.

2) Sorry, currently ARI CSV Table plugin can't do it. But you can submit feature request for this feature and we'll implement it in the next release.

3) You can create CSS file in CSS Templates section on backend part of ARI Smart Content. Each active CSS Template will load with help ARI CSS Templates Loader plugin.

4) You can place to your CSV file the following row

Â ,,,,

If this solution isn't suitable for you, please, say about it and we'll think about another solution.

Regards,
ARI Soft

hi and good morning :)

1. Done, thnx a lot

2. I need some solution for that kind of rows. I can put that text manually in content but then i need to separate tables and make 4 or 6 tables for every page (and 4 to 6 csv files) and i have to make about 100 pages

3. Ok i know how and where to make some css styles, but how to implement them to certain row?

4. that help, thnx again

Q: is this is your usually time of day when you are working? I saw that you response quickly and i'm happy about that but i dont know where you are so i was waiting last night - first timer :)

Good morning :)

Usually we give response from 08:00 (GMT +03:00) till 23:00 (GMT +03:00)

2) Just add request about this feature here <http://www.ari-soft.com/Feature-Request-for-ARI-Smart-Content/> and we implement it.

3) Each row (tr tag) in tbody tag has the following CSS classes:

actRow_{index} - where {index} is index of row. First row will have actRow_0 class, second actRow_1 and etc.

actRow_odd - for odd row

actRow_even - for even row

Each column (usually td tag) has the following CSS classes:

actCell_{index} - where {index} is index of column. First column will have actCell_0 class, second actCell_1 and etc.

Also you can add additional CSS classes with help parameters 'className' and 'headerClassName' which you can define in {aricsvtablecolumn}

Regards,
ARI Soft

ok, but...

can i implement my own css style for specific rows? (Different from page to page)

if i want my rows 2 and 13 to look like header like

http://www.printall.rs/index.php?option=com_content&task=view&id=21&Itemid=55

on that page, and on the second page rows 2 and 16, and ...

or if i want one cell in the middle of the table to have specific look. If i make one css style for row and second css style for column which style will be visible

In {aricsvtable} you can set 'className' paramter. It'll apply to and you can define this parameters from page to page where you need set different CSS rule for row and cell. For your example, it looks like:

Code:

```
{aricsvtable file="file.csv" className="csvTbl_1"}
{/aricsvtable}

{aricsvtable file="file.csv" className="csvTbl_2"}
{/aricsvtable}
```

CSS file:

```
TABLE.csvTbl_1 TR.actRow_1
{
  background-color: red;
}

TABLE.csvTbl_1 TR.actRow_12
{
  background-color: green;
}

TABLE.csvTbl_2 TR.actRow_1
{
  background-color: yellow;
}

TABLE.csvTbl_2 TR.actRow_15
{
  background-color: blue;
}
```

Regards,
ARI Soft

Re:Formating table

Posted by vanka - 2009/02/04 10:26

and for specific cell will be

CSS file:

```
TABLE.csvTbl_1 TR.actRow_4 TD.actCell_6
{
  background-color: red;
}
```

THIS IS GREAT

if you can only solve problem with colspan i will stop with annoying questions

Re:Formating table

Posted by admin - 2009/02/04 11:43

Good news. We have implementer new tag {aricsvtablecolumnspan} in ARI CSV Table plugin. It help you resolve your problem with colspan.

I was waiting for this for looong time a go

I dont have words for how much you help me. I will recomend your products everywhere, and i think i can sell lot of webdesigns with this kind of data presentation.

Your plugin does exactly what you wrote me in my first mail.

take a look

<http://proba.prodavnicaideja.com/content/view/12/27/>

what was wanted

http://www.printall.rs/index.php?option=com_content&task=view&id=22&Itemid=56

now i only wait for full licence to start working on my site
(i already made css template so making new pages will be easy)

thnx a lot lot lot

i want to by you a drink if you ever come to Serbia

Re:Formating table

Posted by vanka - 2009/02/05 08:53

When i can except full licence?

=====

Re:Formating table

Posted by admin - 2009/02/05 09:42

You can read about full and testing license here <http://www.ari-soft.com/F.A.Q./232-F.A.Q.html#232> (Section 4). After your payment is verified, you can generate production license.

Regards,

ARI Soft

Re:Formating table

Posted by vanka - 2009/02/05 09:47

ok i know that

but how many days usualy does it take

just need to make some plans

=====

Re:Formating table

Posted by admin - 2009/02/05 09:51

Usualay, it takes several days. We can provide additional testing license for your production domain.

Regards,
ARI Soft

=====

Re:Formating table

Posted by vanka - 2009/02/05 09:58

That will be nice

so i can work on my domain and when my payment is verified you will notice me with full licence key.(and i should only change keys in administration panel?)

GREAT

=====

Re:Formating table

Posted by admin - 2009/02/05 10:11

Say your production domain,please, and we generate testing license for you. As soon as your payment is verified, you will be notified about it. After this you can generate production license in 'Member Area'.

Regards,
ARI Soft
