Jump from ARIJTAB 1 to ARIJTAB 2 ???

Posted by mniederm - 2009/02/12 22:24

_____

Hi,

is there a possibility (Java Script or PHP) to jump from one TAB to another. For example when I click on a row in
http://www.aktionsfinder.at/aktionsfinder/alle-aktionen.html
on the TAB 'Aktionen als Liste' that I can jump to a anchor on the tab 'Aktionen in BlÑ†cken'?

Michael

_____

Hello,

Currently it is impossible. But we can offer add 'id' parameter in one of the next release. By id you can get tabs javascript object and work with it in javascript. Submit feature request, please, if it is suitable for you.

Regards,
ARI Soft
