# E-mail address in table

Posted by msm_portata - 2009/02/16 23:12

_____

I tied to display data that had email addresses in the tables bit got a real mess.

For a workaround, I disabled the Content - Email Cloaking plugin, so the tables display OK now, but we need to get a real fix so that we can have the tables and e-mail cloaking.

_____

Hello,

Sorry, but this problem in E-mail cloaking plugin. It's used deprecated javascript construction document.write.

Regards,
ARI Soft
