
Customise ARI JTabView

Posted by lingolyrics - 2009/02/24 17:36

Hi,

Ok this is probably a stupid question but I was just wondering is there a way to customise ARI JTabView to make it transparent so it blends with my Joomla template? :)

Thanks in advance

Hello,

Yes, it can customize through CSS Templates. Can you say url where we can see problem that we can help you?

Regards,
ARI Soft

:) I haven't tried the css templates yet as I didn't know you could do it :blush:

The url with an example on is

http://learnfrenchwithsong.com/index.php?option=com_content&view=article&id=72:alizeejenaimarre&catid=23:ae&Itemid=71

I just need to make it transparent or somewhat easy on the eye to blend with the template.

Thanks :)

Hello,

You can do the following:

- 1) Go to 'CSS Templates' section on ARI Smart Content backend
- 2) Click 'Add' new template
- 3) Type the following code:

```
.ui-tabs-panel
{
    background: transparent;
    color: white;
}
```

- 4) Save template

:woohoo: That's fantastic!

Fantastic service once again, thanks!!

No magic, only CSS :) One note, on your site used MooTools javascript library, but ARI JTabView is used jQuery library. That it works without conflict, please, set option 'No conflict' in ARI JQuery Loader plugin to 'Yes'.

:blush: tehehe me again! Sorry :lol:

I am using the css which is working great with the code and having fun playing around with it. :P

I am guessing .ui-tabs-panelis for the main body but how would I style the tabs now like on the demo page where you have the gradient and all? I am such a newbie :(

Of course, sorry, I was a little unclear in my previous post. :blush:

I was looking at the demo page for the ARI JTabView plugin. There, I saw the theme examples like "Corp Cool" and "Black Tie" and was wondering what code I would use to to change the tab buttons on my site using my own colours but to implement the same design. :blink:

:)

You can choose appropriate theme like 'Corp Cool, 'Black Tie' and other in 'ARI JQuery UI Loader' plugin with help 'Default jQuery UI theme' option.
