
various install errors

Posted by davfox - 2009/02/25 13:40

Hello!

I am running Joomla 1.5 and have so far installed several additional modules/components with success.

When I tried to install ARI_SmartContent via the admin interface, extension manager, install/uninstall, package file. I got the error..

There was an error uploading this file to the server.

I the uploaded the unzipped 'com_arismartcontent.1.5.zip' to the server directly and installed by specifying the local folder. This worked but resulted in very many errors being displayed under the page that told me that it was successfully installed.

I've not tested yet to see if it works. Can you tell me if these hundreds of errors are significant and what I would need to do to resolve them.

Thanks

David

Hello,

It seems that the following folders don't have writable permissions:

```
/administrator/components/com_arismartcontent/cache/files
/administrator/components/com_arismartcontent/cache/files/css
/administrator/components/com_arismartcontent/cache/files/i18n/lbackend
/administrator/components/com_arismartcontent/cache/files/lbackend
/administrator/components/com_arismartcontent/cache/files/plugins
/administrator/components/com_arismartcontent/cache/files/thumb
```

Check it, please.

Regards,
ARI Soft

It seems that /administrator/components/com_arismartcontent/cache/files/i18n/lbackend folder haven't writable permissions.
