Closing accordion items

Posted by HillWoody - 2009/02/26 13:22

_____

Hello all,

probably a simple issue: I'm wondering how to close a single accordion item as shown in the first example in

http://smart.ari-soft.com/index.php?option=com_content&view=article&id=2

I setup an accordion according to the "bounceslide"-example within a category description.

The result behaves like the second of the live examples, but I need the behaviour of the first one, where items are opened and closed by click on the same tab.

Thanks for help!

_____

Hello,

Set 'alwaysOpen' parameter to 'false', please. Example:

```
{arijaccordion alwaysOpen="false" animated="bounceslide" width="200" className="acord"}
  {arijaccordionitem title="Title 1"}
    First section
  {/arijaccordionitem}
  {arijaccordionitem title="Title 2"}
    Second section
  {/arijaccordionitem}
  {arijaccordionitem title="Title 3"}
    Third section
  {/arijaccordionitem}
{/arijaccordion}
```

Regards,
ARI Soft
