
CSV Table changing background color on mouse over

Posted by vanka - 2009/03/04 17:40

I get used to yours fast respond so ...

I want to simultaneously change background color of raw and column, on my tables, something like you did on Moo Table demo(but only with raws).

CSS? or i need some extra code.

Hello,

You can use the following CSS rules:

```
TR.actRow_odd:hover
{
  background-color: red;
}
```

```
TR.actRow_even:hover
{
  background-color: green;
}
```

It works fine in modern browser, but it don't work in IE 6.

thnx

i knew what to do with raws but i want columns to be changeable in same hover color as raws (when you move true table you got cross effect) or at least header td

:)

Hello,

For creating cross effect it needs additional code.
