
Fancybox question

Posted by louisl - 2009/03/10 18:04

Hi,

I am interested in purchasing the Ari Smart Content package with a specific interest in the Fancybox plugin. I am an absolute newbie so my question may be simple.

I would like to place a couple of article links within the fancybox, now when an article link is clicked within the fancybox does the article open in the fancybox or does it open on the website main page?

I would like the article to open on the main page.

Thanks

=====

Hello,

Articles will be open in main browser page not in fancy box popup.

Regards,
ARI Soft

Hi,

Thanks for the quick response. That's great, I have a few projects that would benefit from this plugin. Will purchase soon.

Thanks again.
