## aridatatable fatal error

Posted by ultravelvet - 2009/03/12 20:27

---

complete newbie here. i'm trying to use the aridatatable.

i created a folder and placed my csv file there (it's quite large and will get larger as time goes on).

i created an article and loaded this code:

```
{arijdatatable}  
{aricsvtable file="indexdata/Stradinfo-081115.csv" delimiter=";"}  
{/aricsvtable}  
{/arijdatatable}
```

on the frontend, when i navigate to the article, i receive this error:

Fatal error: Allowed memory size of 33554432 bytes exhausted (tried to allocate 4335665 bytes) in  
/home/g4g303/public\_html/cauer/plugins/system/sef.php on line 62

please let me know what i'm doing wrong.

thank you,  
lisa

Hello,

Can you provide this CSV file by email [info@ari-soft.com](mailto:info@ari-soft.com) ?

Regards,  
ARI Soft
