
Using JFancyBox for Video

Posted by larryp - 2009/04/01 05:08

I am trying to use the fancybox popup to show a video. Is this possible? Becasue when i use the following code, the popup appears, but not the video. Everything else works, I just get a "?" instead of the video.

```
{arjifancybox width="522" height="308" title="Dentist"} {arjifbcontent} {/arjifbcontent} {arjifbocontent}
{/arjifbocontent}{/arjifancybox}
```

Hello,

It's incorrect place video in IMG tag. Use the following code, please:

```
{arjifancybox width="522" height="308" title="Dentist"}
{arjifbcontent}
```

```
{/arjifbcontent}
{arjifbocontent}
```

```
{/arjifbocontent}
{/arjifancybox}
```

Sorry, that still doesn't work!

There is now no "?", but the movie still does not appear. Contextual menu says 'movie not loaded'

Can you provide access to your Joomla backend by email (info@ari-soft.com) that we can help you? It seems that you specify incorrect url for flash file.

Not a problem with the url. I can embed the same movie using the JoomlaWorks AllVideo plugin without any problems using the same path to the video as above. However I would prefer to use the ARI JFancyBox.

I can't give access to the site as it is on my computer only (localhost).

You can use ARI JFancyBox with AllVideo plugin. Use the following code:

```
{arjfbcontent width="522" height="308" title="Dentist"}
{arjfbcontent}
```

```
{/arjfbcontent}
{arjfbcontent}
{flv}Dentist01{/flv}
{/arjfbcontent}
{/arjfbcontent}
```

Regards,
ARI Soft
