problem
Posted by moerff - 2009/04/04 20:32
_____

I have installed the smart content pack. And it seems to have installed fine.

now i want to have the accordion effect in the content but it doesnt work?!?

when you look @ www.marv1n.com you will see that the plugin in the module is working.

where can i put the code for the content in?!?

please help me

_____

Hello,

You can type plugin code in article text, can you describe your problem in details, plugin code appears instead of accordion menu or any other?

Regards,
ARI Soft

_____

i have a normal content article... and want to put the following code:

{arijaccordion animated="bounceslide" width="200" className="accord"}
  {arijaccordionitem title="Title 1"}
    First section
  {/arijaccordionitem}
  {arijaccordionitem title="Title 2"}
    Second section
  {/arijaccordionitem}
  {arijaccordionitem title="Title 3"}
    Third section
  {/arijaccordionitem}
{/arijaccordion}

into the article code not with the wysiwyg editor but with the html editor.

when the editor is closed the code is in the wysiwyg editor and it doesnt work?!?

i m confused ^^

_____

It's normal, you will see accordion menu in article on frontend, WYSIWYG doesn't run plugins.
