_____

Hi, is it possible to have the dialog already shown on the page without having to click on the link?

I mean I would like to have in on a specific place on the page, and to allow the user to move it around the page.

_____

Hello,

Sorry, but currently ARI JDialog doesn't support this possibility, but you can submit feature request about it and we'll add this possibility in one of the future releases.

Regards,
ARI Soft
