
Bug? in arijtablesorter.

Posted by AYahoo - 2009/04/13 11:52

Hi, I have two tables in two tabs of the ARI JTabView, I'm trying to apply Zebra style on the tables, on the first one, it is ok, on the second one, it doesn't work!

How can I fix it?

you can see at <http://www.elyahu-group.co.il/products.html>

It works when I add paging to the table, I guess it is too big...

I was wrong again, It works after you move one page, but when you start the page for the first time it doesnt show the zebra...
