# No effect on front end

Posted by tao - 2009/04/22 12:52

_____

Only code appear in front page i type in html editor :

 {arijfancybox url="http://www.yahoo.com" title="Yahoo!"}
  Show Yahoo! site
{/arijfancybox}

to try. it show me a link i click but it doens't open a new window it just leave my website and open yahoo url.
No plugin works on my website.

My e-mail : taoquake@hotmail.com

_____

Hello,

Could you check that /plugins/content/ folder contains arismartcontent.php and arismartcontent.xml files, also check, please, that /plugins/content/arismartcontent/ contains any files and folders. Or you can provide access to your Joomla system and FTP by email and we'll investigate this issue and provide solution.

Regards,
ARI Soft

_____

another problem, Since your investigation, my script login.php and delog.php doesn't works.

it's a meta javascript line in a wrapper who redirect on frontpage after log and delog.

_____

Not sure if I'm doing something wrong.
I installed fancy box and made sure those files were uploaded but the link doesn't even work.
I'm putting the basic code in an article.

http://torahclass.com/new/index.php/new-testament-studies/416-testing-video
The plugin is enabled.

Need some help.
Thanks!

_____

Hello,

It seems that plugin didn't correctly install. Check 'Diagnostics' page on the component backend, please. If it shows that all is ok, try to uninstall and install the component again. If problem still appears, provide, please, access to your Joomla! system by email (info@ari-soft.com) that we can investigate this issue.

Regards,
ARI Soft
