
ARI SQL Table and hebrew

Posted by nondos - 2009/06/02 17:25

Hello,

I'm trying to show hebrew in ARI SQL TABLE, the SQL database encoding set to utf8_general_ci for some reason the hebrew field shows ?????

you can see here http://192.116.71.101/~madika/index.php?option=com_content&view=article&id=12&Itemid=9

any idea how to fix this?

Thanks

Hello,

We have checked it on our test server and all work fine. Could you provide dump for table with sample data which you use and code which you in article for 'ARI SQL Table' by mail info@ari-soft.com?

Regards,
ARI Soft
