
changing the th background color in arijcsv2table

Posted by weidemannf - 2012/03/03 10:35

I am trying to change the color for the table header in the arijcsv2table plugin. I have spent about an hour looking through the forums and can't seem to find where i can edit the css... when i pull up the css templates tab in the back end it's blank. I have been looking for where the table is getting the color it is showing. http://www.grace-fellowship.net/index.php?option=com_content&view=category&layout=blog&id=43&Itemid=85

if you notice there is not enough contrast to read the header easily

sorry to bug you with such a dumb question

Hello,

Create a new CSS template file in "CSS Templates" section (don't forget to update) and add the next CSS rule to create CSS template:

```
TABLE.csv2table-table TR TH
{
  color: red;
  background: yellow none !important;
}
```

or add the CSS rule to a site template file.

Regards,
ARI Soft

This still does not tell me how to change the background color of the template. You need to give specific step by step instructions. "Step 1 go to here", "step 2", and so on. Most other plug-ins expose parameters that are easy to set. If you did something like that. we would appreciate it."

I created the template. Now how do I apply it with the example you provided.

```
TABLE.csv2table-table TR TH
{
  color: red;
```

background: yellow none !important;
}

Enable "CSS Template". It is enough.

Your reply does not make any sense to me. Where do I find what you are saying. It's not in any documentation. I like step by step instructions so that I don't have to keep posting messages here. It should have been a parameter in the module window.

This is what I have.

```
{arijdatatable}  
  {aricsvtable file="data.csv"}  
    {aricsvtablecolumns}  
      {aricsvtablecolumn id="ID" alias="ID" width="20%" className="idg"}  
      {aricsvtablecolumn id="Name" alias="UserName" headerClassName="head"}  
      {aricsvtablecolumn alias="Virtual Column" headerClassName="head" virtual="true" pos="1"}  
    {/aricsvtablecolumn}  
  {/aricsvtablecolumns}  
  {/aricsvtable}  
{/arijdatatable}
```

The color is orange. What do I have to modify to get the gray background instead of this.

About "CSS Template", open "Components -> ARI Smart Content -> CSS Templates" page on Joomla! backend, create a new CSS template and add necessary CSS rule(s) to it and enable created template. That's all. After this created template will be loaded on pages where ARI Smart Content" is used.

About the latest post, it uses "ARI JDatTable" widget, not "ARI CSV2Table" widget so the CSS rules from your first post will not work with code from the latest post. Could you provide a link to a page where we can see a table?

Regards,
ARI Soft
