Editing CSS files

Posted by brocars - 2009/11/09 15:14

_____

Hi

Can you let me know where I can edit the css file(s) for ARI JDataTable?

I can't see any CSS files under the root directory com_arismartcontent

cheers

PJ

_____

Hello,

Just in case, you can find it by the following path:

/plugins/content/arismartcontent//_/

Regards,
ARI Soft

_____

OK, so I found the CSS files but can't seem to figure out how to change the areas indicated in the attached image.

I have "Using jQuery UI themes" set to YES. This gives pretty much the payout I am happy with as long as I can change two areas indicated.

http://www.ari-soft.com/images/fbfiles/images/screen1.gif

many thanks

PJ

_____

The top container has the following structure:

Show

10
25
50
100

entries

Search:

and the bottom container has the following structure:

  Showing 1 to 10 of 14 entriesFirstPrevious12NextLast

PS: If you describe what you want to do, we can help you do it.

Regards,
ARI Soft

_____

quick replies - wicked, that's what I call service.

I just want to change the bg colour (or background image colour) of the top and bottom containers from the current orange/yellow colour to a colour that matches the site.

Where would I do this?

Cheers

PJ

_____

You can create 'CSS Template' in 'CSS Templates' section on the component backend with the following CSS rule:

.dataTables_wrapper .ui-widget-header
{
  background: red none;
}

Regards,

ARI Soft
