Dots in the tabs - Please help

Posted by pjpendleton - 2009/11/21 08:41

_____

I love the look of the tabs plugin but there are dots on the tabs in Firefox if the option to close the tabs is not enabled.

This is only happening in Firefox. I have not tried Opera, Safari, or Google Chrome yet.

You can see an example here

Any ideas? http://www.ari-soft.com/images/fbfiles/images/Tabs_with_dots.JPG

_____

It seems that it's conflict CSS styles. Could you send link to your page with tabs by email (info@ari-soft.com) because link is too long and it was trimmed.

Regards,
ARI Soft

_____

We have found problem. Create 'CSS Template' or open existing in 'CSS Templates' section on the component backend and add the following CSS rule:

#vmMainPage ul.x-tab-strip li
{
  list-style-type: none;
}

It should resolve this issue.

Regards,
ARI Soft

_____

That did the trick.

Once again, thanks for the fast response. You guys are awesome!
