Padding or layout inside tab body - Please help

Posted by pjpendleton - 2009/11/21 17:31

_____

I am trying to adjust the body of the Tabs to have spacing off the border - padding.
What controls this? I've gone through much of the css file and tried different things but have not found the right mix.

See it here: http://www.test.constructionofficeonline.com/construction-templates.html?page=shop.product_details&flypage=flypage.tp-ecommerce.tpl&product_id=6&category_id=41

http://www.test.constructionofficeonline.com/construction-templates.html?page=shop.product_details&f Link

I noticed that Firefox does not allow the table to center in the body but IE does. Have not tried Opera, Safari, or Chrome.

Any ideas?

_____

Hello,

You can create 'CSS Template' on the component backend with the following CSS rule:

.ari-exttab-content
{
  padding: 7px;
}

Regards,
ARI Soft
