\"ARI Smart Content\" Records Limit Problem?

Posted by itbox - 2009/12/19 12:34

Hi,

I am using the "ARI Smart Content" to display records from a database table in some articles.
The problem is when the table rows become more than 200. Then i get a blank page in the URL containing this article (no output from the server).
I have noticed that when i set a limit (lower than 200 records) in the MySQL query, the page and table inside the article appears correctly.

The code i use inside the article is:

{arijtablesorter paging="true" pageSize="15" pageList="15,10"}
{arisqltable}
{arisqltablecolumns}
{arisqltablecolumn headerClassName="tablegenhead" className="tablegencell" cellPadding="2px" id="arapof" alias="xxx1"}
{arisqltablecolumn headerClassName="tablegenhead" className="tablegencell" cellPadding="2px" id="enagon" alias="xxx2"}
{arisqltablecolumn headerClassName="tablegenhead" className="tablegencell" cellPadding="2px" id="enagomenos" alias="xxx3"}
{arisqltablecolumn headerClassName="tablegenhead" className="tablegencell" cellPadding="2px" id="denagontos" alias="xxx4"}
{arisqltablecolumn headerClassName="tablegenhead" className="tablegencell" cellPadding="2px" id="denagomenou" alias="xxx5"}
{arisqltablecolumn headerClassName="tablegenhead" className="tablegencell" cellPadding="2px" id="fysiypoth" alias="xxx6"}
{arisqltablecolumn headerClassName="tablegenhead" className="tablegencell" cellPadding="2px" id="eisigitis" alias="xxx7"}
{arisqltablecolumn headerClassName="tablegenhead" className="tablegencell" cellPadding="2px" id="grammateas" alias="xxx8"}
{/arisqltablecolumns}
{arisqltablequery}SELECT xxx1, xxx2, xxx3 ,xxx4 ,xxx5 ,xxx6 ,xxx7 ,xxx8 FROM #__mytable WHERE jos_mytable.xxx3=14 ORDER BY jos_mytable.xxx1 DESC{/arisqltablequery}
{/arisqltable}
{/arijtablesorter}

I couldn't find any solution... Is this a setting, a memory limit problem or what?

p.s. I upgrated to the latest version of the "ARI Smart Content" plugin (v1.7.4) but the problem remains...

Thank you

==========

Hello,

Could you provide temporary access to your Joomla! backend by email (info@ari-soft.com) that we can investigate this issue? Or try to install plugin which we have sent by email.

Regards,
ARI Soft

Hi,
the plugin didn't work so i emailed you a password to access the joomla backend.

Thank you

Try now, please. It happened because of Joomla! bug. You can read about it here. We installed 'Big Article' plugin and all should work fine.

Regards,
ARI Soft
