How can I group by ?
Posted by clioschrotter - 2010/01/04 13:06

_____

Hello,

I have a table which is working fine so far. The code is:

{arijtablesorter defaultSorting="4:ASC" sorting="TRUE" notSortableCols="0,1,2,3"}
{arisqltable}
{arisqltablequery}
SELECT spieler AS "Spieler"
,pins AS "Pins"
,spiele AS "Spiele"
,(pins/spiele) AS "Schnitt"
,platz AS "Platz"
FROM fab_ergebnisse
{/arisqltablequery}
{/arisqltable}
{/arijtablesorter}

Now I need two things:

1. I need to GROUP BY spieler
But when I change the code like this

{arijtablesorter defaultSorting="4:ASC" sorting="TRUE" notSortableCols="0,1,2,3"}
{arisqltable}
{arisqltablequery}
SELECT spieler AS "Spieler"
,sum(pins) AS "Pins"
,sum(spiele) AS "Spiele"
,(sum(pins)/sum(spiele)) AS "Schnitt"
,platz AS "Platz"
FROM fab_ergebnisse
GROUP BY spieler
{/arisqltablequery}
{/arisqltable}
{/arijtablesorter}

there is no output in the frontend anymore.

2. I need to get data from a second database within this query. But when I change it like this

{arijtablesorter defaultSorting="4:ASC" sorting="TRUE" notSortableCols="0,1,2,3"}
{arisqltable}
{arisqltablequery}
SELECT name AS "Spieler"
,pins AS "Pins"
,spiele AS "Spiele"
,(pins/spiele) AS "Schnitt"
,platz AS "Platz"
FROM fab_ergebnisse
INNER JOIN jos_users ON id=spieler
{/arisqltablequery}
{/arisqltable}
{/arijtablesorter}

there is no output in the frontend anymore.
I also tried it in different ways (From fab_ergebnisse as "FE"....) but it didn't work, too.

Can somebody help me?

Thank you in advance
clioschrotter

_____

Hello,

Could you provide temporary access to your Joomla! backend by email that we can investigate this issues because it requires knowledge of the structure of your tables?

Regards,
ARI Soft

_____

Thank you for your quick response.
Mail with access data was sent to you.

Kind regards,
clioschrotter

_____

Try open your page now, please. We have inserted into article code which you post above and all work fine, but we insert plugin code in 'HTML' mode in WYSIWYG editor. It seems that code didn't work because your WYSIWYG editor added extra HTML tags to SQL queries and broke these.

Regards,
ARI Soft
