
Tags HTML in arisqltable

Posted by benbet - 2010/02/06 19:06

Hi,

How can add HTML TAGS in arisqltable queries ?

Regards

Hello,

For example, if you want to wrap 'Title' column with " HTML tag, you can use the following SQL query in 'ARI SQL Table' plugin:

```
SELECT CONCAT("<`, `Title` , ") AS Title FROM tbl
```

If you need more assistance, feel free to ask any questions.

Regards,
ARI Soft
