
arisqltable on second database not showing data

Posted by janine - 2013/02/10 17:21

Is there any restriction to the count of databases?

My first arisqltable did work. The second to another database not.

Thanks for help

http://www.ari-soft.com/images/fbfiles/files/arisqltable_f1.txt Code not working

Hello,

The plugin doesn't have restriction. Probably an incorrect parameter(s) are used for connection string.

Regards,

ARI Soft

Could you provide a link to a page where we can see the problem and a temporary access to your J! backend by email so we can investigate the problem?

Sended the coordinates per mail

addition:

The working one: Menuitem and Article Dienstplan

The not working one: Menuitem and Article Rennergebnis

:laugh: :laugh: :laugh: :laugh: :laugh:

YES! I see my data. What was wrong? Did you had to change something?

It was problem with SQL query. Switch WYSIWYG editor to plain text mode when enter or edit plugin code.
