
Smart Content Issues That I have

Posted by ETFSmart - 2013/04/07 01:45

I recently purchased the ARI Smart Content and most of the functionality that I require is working. However there are some minor problems that make Smart Content unusable in my application. Perhaps some of this is due to lack of sufficient documentation. Please help with the following:

- (1) How do I left justify column titles in data tables?
- (2) How do I size the header/footer for arijdatatable to be the same as the actual table (see attachment).
- (3) How do I change the header/footer background color to be grey instead of orange?
- (4) How do I reduce the size of the drop down box to select the pagination size?
- (5) How do I middle justify (vertical) the header search box and the footer page controls?

Thank you in advance

Steve <http://www.ari-soft.com/images/fbfiles/images/SmartContent.jpg>

Hello,

Could you send a link to a page where we can see the table because it can be a conflict with site template styles?

Regards,
ARI Soft

Create a CSS template on "CSS Templates" page on component backend and add the following CSS rules to the created template:

```
TABLE.display
{
width: 100% !important;
}
```

```
TABLE.display TH
{
text-align: left;
}
```

PS: Drop-down list with pages is not available for the table on your site.

Thank you for the fast response. OK - so this cured the left justification problem. I guess what you are saying is that the table size has to be 100% so I will have to change the size using some other technique.

How do I change the orange color of the wrapper {arijdatatable}? And how do I vertically center the search field (top right)?

Steve

Add the following CSS rules:

```
.dataTables_wrapper .ui-widget-header
{
  background: none gray;
  border-color: gray;
}
```

```
.dataTables_wrapper INPUT
{
  margin: 0;
  padding: 0;
}
```

OK - the wrapper is grey now. The search box is still top justified. <http://www.etfsmart.com>

Add the following CSS rule to a site template CSS file:

```
.dataTables_wrapper INPUT
{
  margin: 0;
  padding: 0;
}
```

This is already there and the search is still top justified. Here is the contents of the CSS:

```
TABLE.display
```

```
{
width: 100% !important;
}
```

```
TABLE.display TH
```

```
{
text-align: left;
}
```

```
.dataTables_wrapper .ui-widget-header
```

```
{
background: none lightgray;
border-color: gray;
}
```

```
.dataTables_wrapper INPUT
```

```
{
margin: 0;
padding: 0;
}
```

How about I reword the problem? Where is the code for the example provided for ARI Smart Content: ARI jTable plugin including the theme selection?

Use the following CSS rule:

```
.dataTables_wrapper INPUT
```

```
{
margin: 0 !important;
padding: 0 !important;
}
```

Theme can be selected in "ARI JQuery UI Loader" plugin settings. See "Default jQuery UI 1.7.2 theme" parameter.

The margin and padding don't do anything - I wish to vertically center the search within the top wrapper heading.

How does the example select the theme (using a drop down box) without the administrator tampering with the plugin settings?

1. Could you provide an image where we can see what do you want to achieve?
2. Theme can be selected on frontend with help of "ARI JUI Theme Switcher", but it works only for "ARI JAccordion", "ARI JTabView" and "ARI JDialog" plugins.

Use the following plugin code:

```
{arijuithemeswitcher version="1.7.2"}
```

Thanks -

I guess what I was trying to figure out is whether it is possible to support more than one table style on a website. Since you keep going back to the plugin, I assume that is not possible?

I have another question. I am trying to change the odd, even colors for the striped rows. I've tried everything I can think of in the ARI JDataTable Row CSS classes. And I can't find the definition of odd and even CSS classes anywhere. Would it be possible to provide an example of say - alternating Gray, LightGray?

Thanks again for your support.

Use the following CSS rules:

```
TABLE.display TR.odd TD
{
    background-color: Gray;
}
```

```
TABLE.display TR.even TD
```

```
{  
background-color: LightGray;  
}
```
