CSV Tables
Posted by Nadia - 2013/04/22 14:58

_____

Hi,

Since my last post on the forum, the data is now showing up on the screen. But I'm having a problem doing anything with it. How do I get the data to display within one of the table themes that you have for example? And in terms of making it fully responsive, are there any possible solutions?

I have used the following code within an article:

{aricsvtable file="images/excel_csv/lotto-results-mega-monday.csv" delimiter=";"} {aricsvtablecolumns} {aricsvtablecolumn id="ID" alias="ID" width="20%" className="idg"} {aricsvtablecolumn id="NAME" alias="UserName" headerClassName="head"} {aricsvtablecolumn alias="Virtual Column" headerClassName="head" virtual="true"} {coltemplate}{/coltemplate} {/aricsvtablecolumn} {/aricsvtablecolumns} {aricsvtablecolumnspan row="-1,0,2,4" startIndex="0" endIndex="3"} {/aricsvtable}

Attached is a screenshot of what the data looks like now:

_____

Hello,

You can wrap "ARI CSV Table" plugin with "ARI JDataTable" plugin. The code will look like:

```
{arijdatatable}
  {aricsvtable file="images/excel_csv/lotto-results-mega-monday.csv" delimiter=";"}{/aricsvtable}
{/arijdatatable}
```

Using "Default jQuery UI 1.7.2 theme" drop-down in "ARI JQuery UI Loader" plugin settings to choose a theme for "ARI JDataTable".

Regards,
ARI Soft

_____

Hi,

I tried that before and it did nothing at all? I also noticed that the plug-in ARI JQuery UI Loader seems to be grayed out, so I'm not sure if its enabled or not. It is not giving me an option to enable it either. When I hover over the enable tick box I just get a 'no entry' mouse symbol and can't click on it.

Although I can select themes on the right hand side fine. But once again there is no visual output.

Any suggestions?

_____

"ARI JQuery UI Loader" is a system plugin and it is not possible to disable it so "Enabled" checkbox is disabled.

Where we can see a problem with "ARI JDataTable" plugin?

_____

Ok that makes sense, so no need to worry about the plug in itself.

I have changed the code the way you suggested, by wrapping it. The output was the same as it was in the screenshot I attached in the first post. Literally nothing changed visually.

Unfortunately I'm working on localhost so I don't have a live website to show you. (I should probably mention that I'm working in Joomla 3)

The code is now as follows:

{arijdatatable}{aricsvtable file="images/excel_csv/lotto-results-mega-monday-test.csv"} {aricsvtablecolumns} {aricsvtablecolumn id="ID" alias="ID" width="20%" className="idg"} {aricsvtablecolumn id="NAME" alias="UserName" headerClassName="head"} {aricsvtablecolumn alias="Virtual Column" headerClassName="head" virtual="true"} {coltemplate}{/coltemplate} {/aricsvtablecolumn} {/aricsvtablecolumns} {aricsvtablecolumnspan row="-1,0,2,4" startIndex="0" endIndex="3"} {/aricsvtable}{/arijdatatable}

_____

Try to set "All components" parameter to "Yes" in "System - ARI Smart Content" Joomla! plugin and set "Needs jQuery load" parameter to "No" in "ARI JQuery Loader" plugin settings.

_____

Hi,

I have tried doing that and sadly no change at all. I should mention that when I try to use the accordion on its own in an article, the whole page goes blank.

Ideally what I want to achieve is for multiple csv tables to be placed within an accordion. At the moment the parts are not working separately.

Any ideas?

_____

If you see a blank page, it means a PHP error occurs. For example it can occur if value of "memory_limit" PHP parameter is exhausted. Error message can be found in web server error log. Usually it is available in hosting panel or you can set "Error Reporting" parameter to "Development" in Joomla! settings.

PS: You can try to increase value of "memory_limit" PHP parameter with help of PHP Settings plugin.

_____

Ok I will do that. In terms of the csv table not displaying in a specific theme, any solutions for that?

_____

Could you explain in more details what theme do you mean and what is not shown?

Re:SCV Tables
Posted by Nadia - 2013/04/24 08:27
_____

If you go back to my first few posts, the issue was that I can't seem to wrap the csv table in arijdatable. The following code was suggested, which is what I tried initially. However nothing happened at all, visually the table looks exactly like the screenshot I attached in my first post.

{arijdatatable}
  {aricsvtable file="images/excel_csv/lotto-results-mega-monday.csv" delimiter=";"}{/aricsvtable}
{/arijdatatable}

It was then suggested I try to set "All components" parameter to "Yes" in "System - ARI Smart Content" Joomla! plugin and set "Needs jQuery load" parameter to "No" in "ARI JQuery Loader" plugin settings.

That didn't change anything either.

Any more suggestions as to why its not displaying properly?

Regards,
Nadia

We can investigate the problem if you provide a link to a page where we can see it. It can be a conflict with a 3rd party extension.

_____

Unfortunately at the moment I am working on localhost, so the website isn't live.

In terms of other extensions, I am using Code7 Responsive Slider the rest is a custom built template made by me. And obviously built with the use of bootstrap framework partially.

I will leave that for now then. I have slightly styled it manually. So now I have two more questions. How to I apply the style for specifically that table, and not all of them. I used the following css to make the first row background blue, but I want this style applied only to a particular table and not all of them:

.actRow_0 {
 font-size: 15px;
 font-weight: bold;
 background-color: #19265E;
 color: #fff;
}

Second question:
I'm not sure how to span the rows I need properly. As I understand its this code: {aricsvtablecolumnspan row="-1,0,2,4" startIndex="0" endIndex="3"}

If you look at the screenshot attached, how would I span the cell with "First 5 Numbers Drawn" over the 5 cells where the 5 numbers are directly underneath it. And then span "Last 5 Numbers Drawn" across the other 5 cells with numbers?

Kind Regards,
Nadia

_____

I have also just turned on Joomla error reporting to Developer to see what the issue with the accordion was.

This is the error I get:

Notice: Use of undefined constant J2_5 - assumed 'J2_5' in
C:\xampp\htdocs\liberia_new\administrator\components\com_arismartcontent\kernel\Articles\j16\class.ArticleController.php on line 101

Fatal error: Class 'JParameter' not found in
C:\xampp\htdocs\liberia_new\administrator\components\com_arismartcontent\kernel\Mambot\class.MambotProcessHelper.php on line 164

Any ideas?

I also get the following error with just the csv table:

Strict Standards: Only variables should be assigned by reference in
C:\xampp\htdocs\liberia_new\plugins\system\arismartcontent\arismartcontent.php on line 35

_____

Hi,

The update fixed the errors like you said :)

Still nothing happens when I wrap the csv table in {arijdatatable} nothing happens visually.

In terms of other extensions, I am using Code7 Responsive Slider the rest is a custom built template made by me. And obviously built with the use of bootstrap framework partially.

I will leave that for now then. I have slightly styled it manually. So now I have two more questions. How do I apply the style for specifically that table, and not all of them. I used the following css to make the first row background blue, but I want this style applied only to a particular table and not all of them:

.actRow_0 {
font-size: 15px;
font-weight: bold;
background-color: #19265E;
color: #fff;
}

Second question:
I'm not sure how to span the rows I need properly. As I understand its this code: {aricsvtablecolumnspan row="-1,0,2,4" startIndex="0" endIndex="3"}

If you look at the screenshot attached, how would I span the cell with "First 5 Numbers Drawn" over the 5 cells where the 5 numbers are directly underneath it. And then span "Last 5 Numbers Drawn" across the other 5 cells with numbers?

Re:SCV Tables
Posted by admin - 2013/04/25 14:57

_____

Add the following code to {aricsvtable}:

{aricsvtablecolumnspan row="0" startIndex="2" endIndex="6"}
{aricsvtablecolumnspan row="0" startIndex="7" endIndex="11"}

You can also add an unique CSS class name for the table. For this use "className" attribute for {aricsvtable} tag. For example className="myTable" and then use the following CSS rule:

```
TABLE.myTable .actRow_0 {
  font-size: 15px;
  font-weight: bold;
  background-color: #19265E;
  color: #fff;
}
```

PS: "ARI JDataTable" doesn't work with HTML tables which use "colspan" or "rowspan".

Regards,
ARI Soft
