Tutorial Ari Smart Content

Posted by gariko - 2013/06/13 19:26

_____

Hello:

I need tutorial Ari Smart Content.

I also need a tutorial of ARI JDataTable

I want to create a table and load data from a database.

Table I want to display data in addition to link an image, is this possible?

The data will be entered via a form and stored in the database, I would like to use Breezing Form is possible?

_____

Hello,

Each plugin contains description with samples how to use it in "Description" field on plugin settings page and on plugin page on ARI Smart Content site.

Data from a database is loaded based on "SELECT" SQL query. If it is possible to select necessary data from "Breezing form" extension using one "SELECT" SQL query then it is possible to show it with help of "ARI SQL Table" plugin.

Regards,
ARI Soft
