
How to close JAccordion tab

Posted by avilovi - 2013/08/05 07:14

Hello,

I'd like to know how to close JAccordion tab by clicking on its title (if it's possible.)

I'd like all the items to be closed at the start and to open/close them by clicking on the item's title.

Thank you very much in advance.

Hello,

Add alwaysOpen="false" active="false" parameters to {arijaccordion} tag.

Regards,
ARI Soft
