IE7 Compatability ARI Data Tables

Posted by kenton.hodges@gardiners.u - 2013/11/22 17:37

I have a problem with the display of data within IE7 which is used by a client.
Although AriSQLdata returns the data, ARIJDatatable which is used too, does not display (so no functionality for pagination, filters, searches). The page works great in Chrome and IE9.

I am using this code in the article:

{arijdatatable}

{arisqltable}

{ariconnectionstring dbHost="213. (and so on & username & password) dbType="mysql"}{arisqltablequery} SELECT * FROM my_table_name_here

{/arisqltablequery}

{/arisqltable}

{/arijdatatable}

Is this a known problem and if so, how can I resolve it?

Regards.

Hello,

Where we can see the problem?

Regards,
ARI Soft

Switch WYSIWYG editor to plain text mode and remove unnecessary

 and tags in plugin code.

Thanks for the quick response, I'll edit the code and test with our client on Monday.
