Dear Team,

was trying to use the Magnifyer plugin, but doesn't work yet. I get this warning in the component:

Warning: fopen(/home/virtual/aulaforex.com/administrator/components/com_arismartcontent/cache/files/config.php) :

Hello,

Could you please check that the folder and all subfolders have write permissions:

administrator/components/com_arismartcontent/cache

Setting write permissions should help.

Regards,
ARI Soft

Yep, the warning is solved.

But still I can't see the plugin magnifyer working. It's activated thought.

is this setting correct?

{arimagnify src="images/aulaforex/analisis/divs-eur-big.jpg" srcSmall="images/aulaforex/analisis/divs-eur-big-thumb.jpg"}

Many thanks

Thanks for credentials. Where (link, article) can we have a look at the place where you have inserted the magnifier plugin usage?

Under articles, the one titled "Apuntes sobre Divergencias"

You have to make it public to see it on the home page yourself.

Thanks for your time.

The problem is solved. The origin of problem was that plugin files were not installed because of inappropriate folder permissions. So this was not related to the extension itself.

Thanks for your assistance.
