Compare Timestamp smaller now() problem
Posted by mniederm - 2009/01/03 16:02

_____

Hello,

I will use a SQL Statement where I compare a Timestamp if this is smaller then now(), but it do not work, because I think the editor rewrites the < sign. How can I create this statement?

select * from table where date < now();

_____

Hello,

This depends on editor you use. Probably the best way is to turn off WYSIWYG editor in Joomla! administration: User Manager -> Select appropriate user -> set User Editor to "No WYSIWYG Editor"

or write the statement directly in HTML code by click "HTML" button in your editor.

Regards,
ARI Soft

_____

Hello, when I turn WYSIWG off it works, by using the HTML Button it doesn't work.

Thank you
