Text on the right side of the arijnewsslider

Posted by mniederm - 2009/01/12 16:24

_____

Hi,

now the newsslider works on the right frame of my page, but I have a problem with the space between the text and the space to the right side line of the News Slider.

Please see: www.aktionsfinder.at here you can see, that in the first row one letter is cutted, there should be a distance between the last letter and the right side line.

Michael

_____

Please download the latest version of component in member area. Again, the problem was the same as you faced before.

Regards,
ARI Soft
